Snapshot report

Under the agreement for 2015
Vale View State School received

Our full 2015 agreement can be found here:

Our school strategies are on track to meet or exceed our targets

During 2015, we have focused on maximising the benefits of this funding for our students. After reviewing our Great Results Guarantee agreement, it is clear that we are on track to meet or exceed our targeted student outcomes. We continue to implement our strategies to ensure that every student succeeds.

Strategies implemented include:

- Use a teacher aide to run the ‘Reading Tutor’ program as intervention for reading.
- Develop a balanced literacy program including specific phonetic awareness activities (Dandelion readers) and high interest novels for capable readers (U2B) (Fleming & Kleinhenz 2007 Camberwell, Vic.; ACER Press; 2007 Towards a Moving School: Developing a Professional Learning and Performance Culture).
- Provide small group targeted teaching for students based on NAPLAN and PAT data (Shaddock, A 2014 Using data to improve learning: A practical guide for busy teachers ACER Press, Australia).
- Purchase TRS to enable all teachers to meet with the principal for twice a term data discussions to provide a method for teachers being accountable for evaluating and modifying instructional practices to meet student needs (Shaddock, A 2014 Using data to improve learning: A practical guide for busy teachers ACER Press, Australia).

Our school strategies are showing substantial progress toward our targets

After reviewing our Great Results Guarantee agreement, it is clear that we have made progress toward our targeted student outcomes. We will continue to focus on maximising the benefits of this funding for our students, and adjust our strategies as needed to ensure every student succeeds.

Strategies implemented include:

- Use ‘Singapore Maths’ resources which are based on foundational research that has identified effective approaches to mathematics, to teach students problem-solving strategies for number (2005 study “What the United States Can Learn From Singapore’s World-Class Mathematics System)
